

Amendments to the Specification

Kindly insert the following replacement title:

~~ATM Currency Cassette Arrangement~~ Reject Bin Having Separated Storage Areas For
Diverted And Retracted Currency Notes

Kindly insert the following replacement paragraph for the paragraph at Specification page 1,
lines 2-4:

This application claims the benefit of U.S. Provisional Application No. 60/451,086 filed
February 28, 2003; and is a divisional of U.S. Application No. 10/750,571 filed December 30,
2003, which claims the benefits of U.S. Provisional Application No. 60/437,636 filed December
31, 2002 and U.S. Provisional Application No. 60/437,637 filed December 31, 2002, and the
disclosures of each are incorporated herein by reference.

Kindly insert the following replacement Abstract:

ABSTRACT

~~An ATM currency cassette (208) includes a plurality of movable cassette information indicator buttons (214). Each button can be rotated about an axis for repositioning. The buttons can be axially moved outward and inward relative to the cassette housing (210) by rotation thereof. Different axial arrangements of the buttons represent respective different characteristics of cassette content. The cassette can be inserted into an ATM where the button positions can be read by the ATM. The cassette enables unused buttons to remain therewith and also permits a button arrangement to be changed without requiring opening of the cassette.~~

ABSTRACT

A reject cassette can commonly receive and separately store both diverted and retracted currency notes. The reject cassette includes a diverted note storage area and a retracted note storage area. The diverted note storage area receives notes deemed unpresentable to a customer. The retracted note storage area receives previously presented notes that were left by a customer. A movable partition directs the notes to the appropriate storage area.
